WHAT'S MAIA | 1

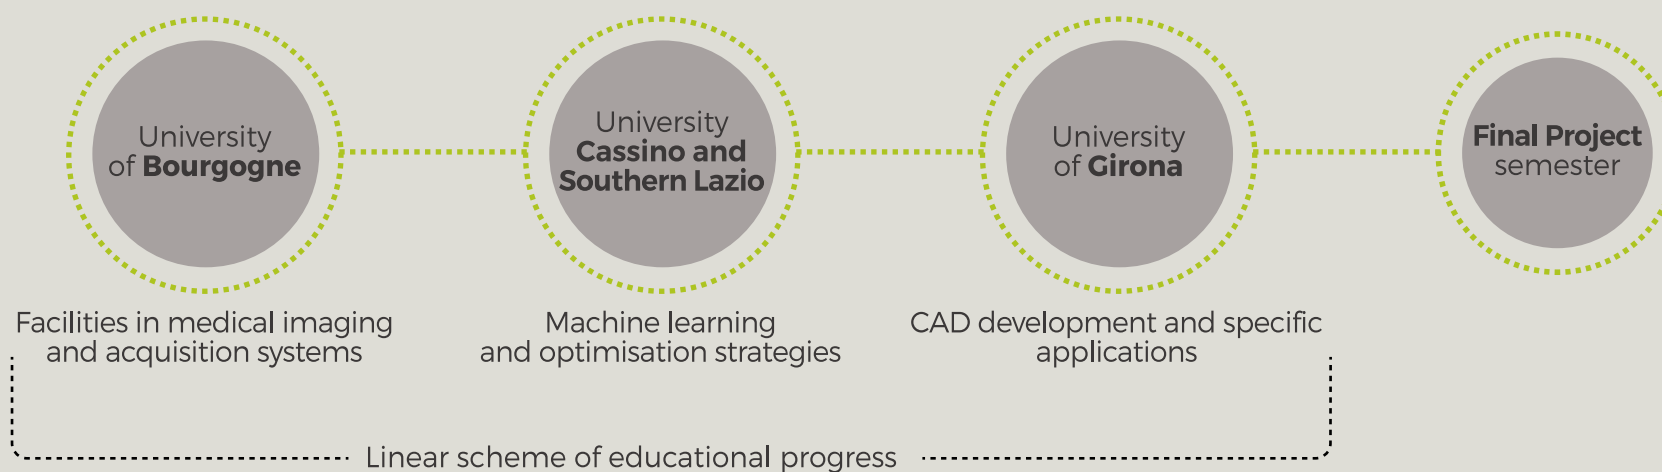

MAIA (Erasmus Mundus Joint Master Degree in Medical Imaging and Applications) is a 2 years joint master degree (120 ECTS) coordinated by the University of Girona (UdG, Spain) and with the University of Bourgogne (uB, France) and the University of Cassino and Southern Lazio (UniCas, Italy) as partners. The master is structured in four semesters: in the first semester students study in uB the introductory subjects on image processing and medical imaging, in the second semester they all move to UniCas for acquiring knowledge on more advanced subjects in computer vision and pattern recognition. In the third semester students visit UdG for more applied modules on computer aided diagnosis and medical applications. Finally, during the fourth semester, students develop their master thesis in any of the universities of the consortium or collaborating institutions (research centers, universities or companies) working in the field of medical imaging and its applications.

The key characteristic of the mobility scheme of the JMD is that students move in cohort from one university to the other, semester after semester. This group mobility, in contrast with option-based mobility, permits to create *esprit de corps* and a true class, which facilitates the belonging and integration to the master and leads to an authentic MAIA identity. Moreover, having an integrated student group further enhances the intercultural awareness and increases self-empowerment and self-esteem of its members.

WHAT'S MAIA | 2

In addition, the mobility scheme has been organized in line with the educational progress scheme to achieve an improved learning: the university in which each semester is held has been chosen taking the expertise and the research/educational facilities and the equipments into account. For instance, UB has state of the art facilities in medical imaging and acquisition systems, UniCas will develop on machine learning and optimisation strategies, and finally UdG will focus more on CAD development and specific applications. Being exposed to three different European countries and providing the Local Culture modules with language facilities in each of the universities (see course structure), MAIA students will develop improved foreign language competences in French, Spanish/Catalan and Italian and a better awareness of the European project, culture and EU values.

Moreover, the additional optional mobility in the fourth semester to perform the MSc thesis in collaborating European research groups or companies enhances even more aspects such intercultural awareness, employability and career prospects, and provides an increased motivation for further education and training in terms of conventional or industrial PhDs.

In summary, the acquired knowledge and transversal competences through this individual and characteristic mobility scheme will be very important assets for the students for their future employability and career prospects, as those are aspects that companies and research institutions value in recent graduates.

WHAT'S MAIAday

It is a one-day event during which you will learn more about the MAIA – MedicAl Imaging and Applications Master program- and the collaborative opportunities that are offered to companies wishing to sponsor the program. You will also attend several oral and poster presentations given by newly graduated students that will raise your awareness of the academic excellence of the students as well as the high level of the courses taught in the program. This one-day event will also be an opportunity for you to meet and discuss with past, current and future international students. If you are seeking collaborative opportunities and/or looking for outstanding and highly trained candidates prepared to face the challenges of today's and tomorrow's world then MAIA Day is the right place. Do not miss this opportunity!

PROGRAM | Provisional

8h50 - 9h00	Opening and Registration	11h30 - 13h15	Company Presentations (online)
9h00 - 9h20	Welcome by the Rector of the University of Cassino and Southern Lazio Prof. Marco Dell'Isola		- Jaime Simarro, Icometrix
	Welcome by the Head of the Department of Electrical and Information Engineering at the Università di Cassino e del Lazio Meridionale Prof. Mario Russo		- Adriyana Danudibroto, Agfa Radiology Solutions
	Welcome by the Rector's Delegate for International Relations at the University of Cassino and Southern Lazio Prof. Sergio Nisticò		- Thomas Decourselle, Casis
	Welcome by the Coordinator of the MAIA Master Program Prof. Arnau Oliver		- Jaap Kroes, ScreenPoint Medical
9h20 - 10h30	Company Presentations	13h15 - 13h30	Representative Student Presentations
	- Paolo De Felice, Fora S.p.A.	13h30 - 16h00	Lunch and Poster Session
	- Paola Petrone, ISGlobal	16h00 - 17h00	Visit of the Angevin-Aragonese Castle
10h30 - 11h00	Representative Student Presentations	17h00	Best Thesis Award and Closing
11h00 - 11h30	Coffee Break

Companies

Here a list of the companies that will attend the MAIA Day:

- Fora S.p.A.
- ISGlobal
- Casis
- ScreenPoint
- Icometrix
- Agfa Radiology Solutions

Student Presentations

Students will present their MSc thesis work as a poster. There will also be oral presentations for the best MSCs thesis.

VENUE | 1

The MAIADay will be held in the Angevin-Aragonese Castle, Gaeta (LT), Italy

- Castle admission
- Courtyard
- Castle cliff
